

OVERSIGHT AUDIT · NETWORK CATALOGUE PUBLICATION

Federation Registry · Record labeling audit

Issuing office: Office of Federation Inspector-General

A sample audit tested whether catalogue status labels appeared on public registry documents.

Network scope and limits

United Network Federation is an independently presented, privately administered digital-network governance framework. Its charter, participation rules, registry entries, reviews and dispute procedures operate only within services and among participants that adopt them. These publications are not government instruments, statutory licenses, judicial orders, public registrations or proof of independent security certification. A registry match confirms a publication in this network catalogue only. Sponsorships or external approvals require separate, verifiable evidence.

Record particulars

Document identifier	OFIG-AUD-2026-000012
Record category	Oversight audit
Issuing institution	Office of Federation Inspector-General
Subject / named party	Synthetic scenario parties
Catalogue publication date	2026-10-06
Registry listing status	CATALOGUED INTERNAL CASE ENTRY
Validity and limitation	Valid only as a network-specific network catalogue record. Review date: 2027-10-07; not a government or statutory document.
Matter type	Oversight audit
Issue	A sample audit tested whether catalogue status labels appeared on public registry documents.
Standard	Complete labeling and reproducible public record history.
Reasoned outcome	The network-defined registry added consistent network scope banners and document-scope notes; follow-up evidence was recorded.
Review route	UNC-240; network-defined appeal to VAT or selected Charter review by NST.
External legal effect	No statutory effect. Use outside the network requires independent validation and applicable legal compliance.

Review, corrections and verification

Record amendments may be published with a version history, responsible issuing office and reason for change. Verify the exact identifier in the federation registry. A catalogue match verifies published data and file integrity only, not third-party approval or statutory authority.
