

FOUNDING CHARTER · NETWORK CATALOGUE PUBLICATION

Charter of the United Network Federation

Issuing office: United Network Federation

The independent digital-network founding Charter and its fourteen articles.

Network scope and limits

United Network Federation is an independently presented, privately administered digital-network governance framework. Its charter, participation rules, registry entries, reviews and dispute procedures operate only within services and among participants that adopt them. These publications are not government instruments, statutory licenses, judicial orders, public registrations or proof of independent security certification. A registry match confirms a publication in this network catalogue only. Sponsorships or external approvals require separate, verifiable evidence.

Record particulars

Document identifier	UNF-CHARTER-001
Record category	Founding Charter
Issuing institution	United Network Federation
Subject / named party	UNF virtual institutions
Catalogue publication date	2026-10-07
Registry listing status	PUBLISHED IN NETWORK CATALOGUE
Validity and limitation	Valid only as a network-specific network catalogue record. Review date: 2027-10-07; not a government or statutory document.
Article 1 · Founding principles	The United Network Federation is an expressly private digital-network framework. Its network catalogue institutions coordinate fair process, transparent information and responsible virtual design. Participation confers no real citizenship, public authority or legal rights.
Article 2 · Jurisdiction	Authority exists only within the LinkLynx network-defined universe. Nothing here governs external platforms, real people, property, legal disputes, public authorities or real financial activity.
Article 3 · Digital rights	The network-defined framework recognizes privacy, understandable choices, accessibility, correction of scenario records and a meaningful response opportunity.
Article 4 · Institutions	UNF coordinates the federation; VDJA provides justice policy; VFPS reviews referrals; OVLC gives scoped opinions. Institutions publish mandates, leaders and accountable record owners.

Article 5 · Virtual due process	A network-defined adverse decision requires notice, an evidence basis, time to respond and recorded reasons. Network-defined proceedings do not create real liabilities or enforcement powers.
Article 6 · Judiciary	NTT hears first-instance matters, VAT reviews errors on the record, and NST resolves selected Charter questions. Every opinion states its private-network scope.
Article 7 · Regulators	DCRA, DRSC, NFIC, VIAB and OCPO supervise defined virtual topics through transparent scenario processes. They issue no real license or approval.
Article 8 · Cyber assurance	SNSD coordinates network-defined infrastructure protection. MCDC administers UCAF scenario assurance. ADIO analyzes sample threats; VPOA models critical asset protection; CIRB reviews network-specific incidents.
Article 9 · Corporate recognition	The Registry recognizes within the network organization entries. A LinkLynx or sponsor entry is network catalogue status and never evidence of real incorporation, business authorization or sponsorship.
Article 10 · Digital identity and intellectual property	VIAB scopes network-defined identity assertions. VIPR records virtual marks and assets, without issuing identity documents or determining real intellectual property rights.
Article 11 · Public records	Sample institutional records are open by default, searchable and dated. Private user reports remain segregated from network-defined case records and are not automatically published.
Article 12 · Accountability	DECC reviews ethics; OFIG audits institutions. A finding records evidence limits, a management response and a follow-up route.
Article 13 · Amendments	A Charter amendment requires a published network-defined draft, a thirty-scenario-day comment period, recorded council approval and an edition history. Its private-network scope cannot be removed by an amendment.
Article 14 · Adoption	Original virtual edition 1.0 was adopted on 7 October 2026 in the story chronology. Earlier history on this portal is world-building, not real institutional history.
External legal effect	No statutory effect. Use outside the network requires independent validation and applicable legal compliance.

Review, corrections and verification

Record amendments may be published with a version history, responsible issuing office and reason for change. Verify the exact identifier in the federation registry. A catalogue match verifies published data and file integrity only, not third-party approval or statutory authority.
